Summary

Full Stack Software Engineer with 1.5+ years of experience in MERN stack development. Skilled in Node.js, Express.js, React.js, TypeScript, MongoDB, REST APIs, and JWT authentication. Experienced with OpenAI API, AWS, Stripe, Firebase, and third-party integrations.

Education

Marwadi University

Rajkot, Gujarat

Master of Computer Applications (MCA)

Saurashtra University

Rajkot, Gujarat

Bachelor of Computer Applications (BCA)

Technical Skills

Programming Languages: JavaScript (ES6+), TypeScript

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, REST API Development, Middleware, Socket.IO

Databases: MongoDB, SQL, Schema Design, Indexing

Authentication & Security: JWT Authentication, Role-Based Access Control (RBAC), API Security, Input Validation

Cloud & Integrations: AWS, OpenAI API, Stripe, Firebase Cloud Messaging (FCM)

Developer Tools: Git, GitHub, Postman, VS Code, npm

Software Development: Object-Oriented Programming (OOP), MVC Architecture, Agile Methodology, Debugging, Code Review, Performance Optimization

Professional Experience

Empyreal Infotech

Jul 2025 – Present

Full Stack Software Engineer (MERN)

Rajkot, Gujarat

- Built cloud-based MERN applications using TypeScript for 5+ enterprise clients, maintaining 99% uptime.
- Designed REST APIs and MongoDB schemas, reducing database retrieval time by 50% and improving application security.
- Integrated OpenAI API, Stripe, and AWS services into multiple applications while building reusable React components that reduced development time by 50%.
- Worked with cross-functional teams in an Agile environment to deliver software updates 20% faster while maintaining high code quality.

Empyreal Infotech

Jan 2025 – Jun 2025

MERN Stack Developer Intern

Rajkot, Gujarat

- Built commercial web applications and delivered 3 major features during the internship.
- Designed and optimized REST APIs and MongoDB queries to support JWT authentication for over 1,000 daily requests.
- Built reusable React.js components and resolved more than 50 critical bugs before production releases.
- Collaborated in Agile sprints to deliver more than 10 frontend modules on schedule while maintaining code quality.

- Participated in API testing, debugging, and code reviews, resolving more than 50 issues before production deployment.

Projects

Scout Robotics — Railway Monitoring Dashboard

React.js | Node.js | Express.js | MongoDB | AWS

- Created a railway monitoring dashboard for a USA-based client to track more than 500 trains daily.
- Developed responsive data visualization modules integrated with AWS services, providing real-time insights with less than 200ms latency.
- Built REST APIs to process live data streams and generate more than 5 scheduled reports and system health alerts daily.
- Optimized React.js components, reducing dashboard load time by 35% and improving user experience.
- Collaborated with stakeholders to resolve production issues, achieving a 95% resolution rate within 48 hours.

OVE — Women's Health & Period Tracking Platform

React.js | Node.js | Express.js | MongoDB | OpenAI API | Stripe | Firebase

- Engineered a full-stack healthcare platform supporting more than 75,000 concurrent users across web and mobile applications.
- Architected MongoDB schemas and established access controls to securely manage over 50,000 health records.
- Integrated OpenAI API to provide AI-powered health assistance, increasing daily user engagement by 40%.
- Configured Stripe, Firebase Cloud Messaging (FCM), and scheduled cron jobs to process over 2,000 monthly transactions and notifications.
- Built a modular backend architecture with middleware validation, reducing server-side errors by 50%.

Chance AI — AI-Powered Dating Platform

React.js | Node.js | TypeScript | Express.js | MongoDB | Socket.IO | OpenAI API

- Engineered an AI-powered dating platform using React.js, Node.js, and TypeScript with a scalable application architecture.
- Integrated OpenAI API to generate personalized user profiles, increasing profile completion by 25%.
- Built real-time messaging using Socket.IO with message delivery under 50ms.
- Implemented secure REST APIs and authentication to protect data for more than 1,000 active users.
- Automated recurring subscription and payment workflows using Stripe, increasing subscription conversion by 15%.

ARCC — Smart Biking & Ride Analytics Platform

React.js | Node.js | Express.js | MongoDB | Socket.IO | JWT

- Built a real-time ride analytics platform for more than 1,000 active cyclists, processing live telemetry data including distance, duration, and speed.
- Designed REST APIs with JWT authentication and request validation to ensure secure and reliable data processing.
- Enabled live location tracking using Socket.IO, supporting real-time synchronization for over 100 concurrent users.
- Created MongoDB schemas for efficient storage and analysis of historical ride data.
- Refactored backend modules and reusable frontend components, reducing future development effort by an estimated 25%.
